ABOUT US

About
ABK Food Chem LLP

At ABK Food Chem LLP, we specialise in manufacturing **high-purity food ingredients** designed for export, wholesale distribution, and industrial-scale food production across global markets. Headquartered in Ahmedabad, Gujarat, we combine time-honoured formulations with rigorous modern quality control to deliver products that perform — every batch, every time.

Global Trade Focus

We manufacture high-purity ingredients designed for global trade, bulk supply, and industrial-scale applications.

Authentic Formulations

Our formulations preserve authentic performance while applying modern quality control standards — batch after batch.

Reliable Partnership

Consistent batches, hygienic processing, and dependable delivery make us a trusted long-term trade partner.

GOALS

Objectives & Goals

To strengthen our position as a trusted export-grade food ingredient manufacturer through quality, consistency, and long-term global partnerships.

01 Export-Grade Quality

Every batch meets international purity and performance standards. Our certified processes ensure your buyers receive consistent, compliant product every time.

- High purity formulation
- Certified manufacturing process
- International compliance

02 Reliable Bulk Supply

Scalable production ensures uninterrupted ingredient availability for orders at any volume — from trial orders to full container loads.

- Scalable production volume
- On-time delivery guarantee
- Flexible order sizes

03 Long-Term Partnerships

Built on trust, transparency, and sustained collaboration with every trade partner. We invest in relationships, not just transactions.

- Trust-based engagement
- Transparent communication
- Sustained collaboration

OUR PRODUCTS

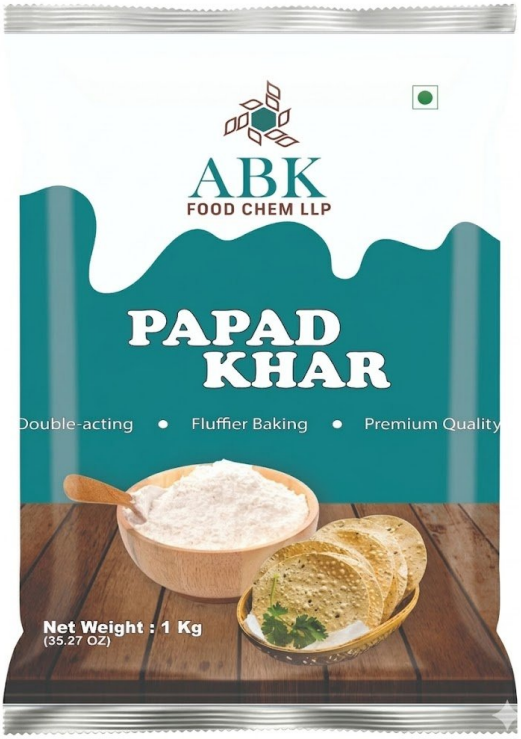
Product Portfolio

Authentic Performance. Unmatched Consistency.

PAPAD KHAR

Premium Alkaline Agent

- High Purity Formulation
- Uniform Granulation
- Excellent Expansion Performance
- Batch-to-Batch Consistency
- Bulk Manufacturing Ready
- Hygienic Processing Standards



BAKING POWDER

Industrial Leavening Agent

- Controlled Leavening Strength
- Uniform Mixing Properties
- Stable Shelf Life
- Reliable Bulk Performance
- Industrial Bakery Grade
- Double-Acting Formula

Two premium products. One trusted manufacturer.

PAPAD KHAR

Premium Alkaline Agent
for Authentic Papad Production

- High Purity Formulation
- Uniform Granulation
- Excellent Expansion
- Batch-to-Batch Consistency
- Bulk Manufacturing Ready
- Hygienic Processing

IDEAL FOR

- Papad Manufacturers
- Export Houses
- Large-Scale Food Processors

PRODUCT DETAIL

What is Papad Khar?

Papad Khar, traditionally known as **Sajji Khar**, is a specialised food-grade alkaline salt essential for achieving the authentic texture, crispiness, and longevity required in traditional Indian snacks and modern food processing. Sourced and processed to meet international food safety standards, it serves as a versatile **pH regulator** and **dough conditioner** for both artisanal and industrial kitchens.

Key Functional Advantages

Superior Texture & Expansion

Acts as a primary aeration agent — ensures papads and snacks expand uniformly achieving a signature light, crispy snap upon frying or roasting.

Enhanced Dough Elasticity

Modifies protein (gluten) structure, improving dough workability and creating the ideal consistency for rolling and shaping.

Scientifically Balanced

Formulated for optimal pH regulation (pH ≈ 8–10 in solution), free from impurities and heavy metals.

Applications & Uses

- Rice Papad, Udad Papad, Appalam, Moong Dal Papad, Sabudana Papad, Punjabi Papad, Garlic Papad & more
- Boiling pulses — makes them softer, reduces cooking time significantly
- Day-to-day cooking — enhances taste and reduces preparation period
- Meat & non-veg preparations — tenderises, enhances flavour, reduces cooking time

BAKING POWDER

Scientifically Balanced
Leavening Agent — 100% Pure

- Controlled Leavening Strength
- Uniform Mixing Properties
- Stable Shelf Life
- Reliable Bulk Performance
- Industrial Bakery Grade
- Double-Acting Formula

IDEAL FOR

- Commercial & Large Bakeries
- Industrial Food Manufacturers
- Export Houses & Wholesale Distributors

PRODUCT DETAIL

Industrial-Grade Leavening

Our Baking Powder is **scientifically balanced** to ensure consistent rise, softness, and volume across all baking applications. The **double-acting formula** delivers reliable, repeatable results in industrial-scale production — from artisan bakeries to large-volume commercial facilities.

How Double-Acting Works

First Reaction — Mixing

Reacts with liquid at room temperature to produce initial CO■ bubbles, distributing leavening uniformly throughout the dough or batter.

Second Reaction — Heat

A second, larger release of CO■ occurs during baking, providing the primary lift and ensuring consistent volume and texture.

Result — Perfect Every Time

The controlled two-stage leavening means every batch rises predictably — no flat bakes, no inconsistencies.

Applications

- Breads, rolls, loaves & artisan baked goods
- Cakes, muffins, cupcakes & sponge products
- Biscuits, crackers, cookies & snack items
- Industrial pre-mixed flour & baking blends

WHO WE SERVE

Our Target Audience

Our food ingredients are engineered to deliver consistent results in high-volume production environments — from small batch exporters to large-scale manufacturers.

01 Export Houses

International shipping partners needing consistent quality, export-compliant packaging, and full trade documentation support.

02 Industrial Food Manufacturers

High-volume processors requiring strict quality specifications and a reliable, uninterrupted ingredient supply chain.

03 Wholesale Distributors

Regional distributors supplying retail chains and food service operators who demand batch-consistent product.

04 Large Bakeries

Professional bakery chains and industrial kitchens demanding precise, repeatable leavening performance at scale.

05 Papad Manufacturers

Dedicated papad producers — from artisan operations to large factories — requiring high-purity Papad Khar for authentic results.

06 Caterers

Large-scale catering operations and event kitchens seeking reliable, quality-assured ingredients for high-volume food preparation.

OUR STRENGTHS

Why Choose ABK Food Chem LLP

We understand that in export and wholesale markets, consistency protects your brand reputation. Every product, every batch, every time.

Export-Grade Manufacturing

Our entire process is calibrated to meet international export quality requirements — giving your buyers confidence with every shipment.

Strict Quality Control

Multi-stage testing at every production step ensures product integrity. No shortcuts, no compromises.

Hygienic Processing

Food-grade hygiene standards are maintained throughout production and packaging, meeting global food safety expectations.

Custom Bulk Packaging

Flexible packaging options are tailored to your distribution requirements — from small trial packs to full bulk orders.

Reliable Supply Chain

Streamlined logistics ensures on-schedule delivery every time, so your production line never stops.

Global Trade Readiness

Full documentation and compliance support for smooth international trade across multiple markets.

Quality is not an act — it is our habit.

Every product. Every batch. Every time.

DIFFERENTIATORS

How We Are Different

Where Purity Meets Professionalism — We don't just supply ingredients; we deliver the assurance that your product will perform.

01 Tradition with Technical Control

We preserve authentic formulations while applying modern quality standards and rigorous testing — the best of both worlds.

02 Batch Reliability

Every shipment maintains uniform quality — no surprises, no inconsistencies, ever. Your production plans stay on track.

03 Industrial Focus

Designed for bulk buyers, exporters, and manufacturers who need scale without compromise on purity or performance.

04 Long-Term Partnership

We prioritise trust, transparency, and sustained collaboration over short-term gains. Your success is our success.
